

The pocket-sized CNP102U is the latest USB print server from Cnet that allows USB printers to be shared on the network. The print server is equipped with an auto-sensing 10/100Mbps RJ45 port for network connections. Through a superior Print Server admin tool, CNP-102U is easy to setup, configure and manage from all major windows operating systems. This high performance print server is perfect for small, medium and large networks.

Key Features

- Compact pocket size with USB1.1/2.0 compliance
- Equipped with one 10/100Mbps Ethernet Port
- Supports multi-protocols, ideal for printer sharing in mixed-LAN environments
- Windows-based administrative program, setup the printer sharing environment within few minutes
- Offer LPR program for Windows 98/ME/2000/XP/2003 TCP/IP printing
